

My Home

My house sits on 5 acres of land. It's a big old house. The house is mostly a rock house except for the parts that was built later.

The original parts of the house was built in 1918, just after world war I. I a neat old house. The upstairs has office built in and there is another room up there that is made of Cedar. My mom keeps a lot of mine and my brothers baby stuff in there.

We don't use the up stairs for living because it's too hot in the summer and too cold in the winter. I have lived in my house my whole life.

My parents started living in it after they got married in 1986 and they bought it in 1991. They tell me that there have been several Doctors that have owned this house including Doctor Kelley.

Our house is about a half mile from the Crooked Creek. I like to walk down to the end of our road and look at the water. Some mornings you can smell the creek from our house. When it has rained a lot you can hear the water flowing. I have tried

to fish there, but I not very good at it so I like to walk around looking for skipping rocks and to try to skip them across the water. I'm pretty good at skipping rocks. In the summer time we sometimes go down there to swim and look for crawdads.

There are lots of trees around us. My family and I like to hike in the woods. I like to climb up trees and sit on a branch and watch for animals and look for bugs.

We have lots of wild animals that come up to our house. There are a bunch of family deer that come into our yard to eat from our apple trees in the fall. There are wild Turkeys, groundhogs, armadillos, opossums, skunks, racoons, rabbits and squirrels. It is a lot of fun to see all these animals in my own yard. I love where I live.
