

My Favorite Season in the South-Shore Region

Shore -

The Southshore area is filled with fun. There are picnics in the Spring, fishing and swimming in the summer, horseback riding in the autumn, and hunting in the winter. Of all of these though, my favorite is the summertime.

I love the summertime because the air is always hot and steamy and everyone gets to be outside. There is no school and family vacations are some great things too. I enjoy whenever me and my family go out on the lake. I cook hotdogs and hamburgers while my dad and brother fish, and my mom lays out. I swim out as far as I can go usually. Jumping off the boat and tubing are some other things that I do for fun. I also like to sit on the shore and sketch the landscape. I draw the pine trees hanging off cliffs and the birds flying down to scoop up minnows. The scenery is breathtaking at sunset. Sometimes I go outside and sit on my lawn and watch the sun go down.

Whenever I do these activities I lose track of time. When I go tubing the waves splash my face and the engine of the boat motor hums. I laugh and yell or even try to do tricks on the tube. Whatever I do I always end up falling off. Of course I have a life jacket on that drives me insane of course. When I swim it's usually

underwater. I love to pick up and examine objects that I find unique. Whenever I was younger I used to take a net with me to try and catch perch and crawdads. I learned how to swim at about the age of two and have lived in the water since that time. Whenever I sketch its of practical objects such as my family having a picnic or of my horses Tango and Chia. I sketch the green tree-filled mountains, and the low sloping hills filled with livestock. I also enjoy sketching houses, like old run down cabins or mansions with vines all over them. I enjoy the hunting and fishing of summer too. All the bass come out from the cold spring water. I love to just fish for perch. The huntings great too. I love to go squirrel hunting. I've gone deer hunting but I still haven't managed to kill one yet. I love growing my own little vegetable gardens to. I grow tomatoes and peppers and cucumbers.

I love to ride horses. I have two horses named Tango and Chia. Tango is twenty and she is a gray appendix horse. Chia is six and she is a red roan quarter horse. I barrel race them in the local arenas and some other places that are pretty far off. When I'm on the horse the adrenaline rush just washes over me. I love the summer just because I get to be active. I might want to tell you exactly where the Southshore region is. To start off its in America, then it moves to the USA. Its in Arkansas in some of the following towns, Flippin, Yellville, Bergman, Bruno Pyatt, Lead Hill and Omaha.

The Southshore area is a great place to live. Every day is filled with fun and adventure of all ages. All of the seasons are wonderful to experience. My favorite would have to be the summertime, because of all the outdoor activities.
