

My Favorite Fall Activity in the South Shore Region

There are many fall activities to do in the South Shore region, but I prefer to go to the Hickey Park. Why would I choose the park out of all the other things to do? I like the park because it is a great place to exercise, it is better than my old park, and it is a good place to spend quality time with friends and family.

First of all, the park is a great place to exercise. I have an exercise plan every day where I have to walk at least one mile a day. The park is the best place to do that, especially since I live close to it. Without the park, I don't know where I would exercise.

I recently moved here and this park is better than my old park. The Hickey park is open real early and closes late in the evening, so it is convenient to my schedule. The Hickey Park has a more beautiful scenery than my old park, because it has nice, strong playground equipment, big trees that provide enough shade, the flag that represents our country, and it is very well kept neat. I can have birthday parties and other celebrations at the park too.

The park might not seem that fun and interesting to someone else, but I can spend quality time with friends and family there. I have many activities and many options to choose from, like tennis, volleyball, soccer, and baseball. The park has a basketball court too, so I can play the sport I love to play most of all. The park is the best place for parents to come and watch their kids play their soccer and baseball games.

In addition, the Hickey Park is where I prefer to spend most of my free time. To be able to have the best park, exercise, and spend quality time with friends and family, all in one surrounding, the park is an awesome place to experience more than once!
